Subject: Sufco 2006 4th Quarter Water Monitoring Data Submittal

Dear Pam:

Sufco has successfully uploaded the Sufco mine 2006 4th quarter water monitoring data to the Division EDI site with the exceptions listed below.

1. The EDI program will still not accept a standard deviation warning okay check for Pines 105 to let me release it for upload to the main data base. I had the same problem the last two quarters on this spring site. It will need to be released from the Divisions end again this quarter until the EDI program error problem is corrected to solve this problem for Sufco to release the sample.

2. Spring M-SP08 has some minor error problems also.

A) The mean flow is being listed as zero flow even though all the samples have had flow values and this has flagged all the samples as exceeding the 2 standard deviations requiring a verification warning check each time.

B) Two non-required parameters are being red flagged as being required with no parameter reading for this quarter and needs to be corrected in the system.

If you have any questions, please send me an email or call me at (435) 286-4421.

Thanks,

Mike
